Answer Sheet
Real Conditional sentences (1st Conditionals)

I. Match the sentences halves.

- If you write too much code without running it, you will find it more difficult to find errors.
- If you follow indenting rules, you will avoid mistakes.
- If you negotiate, you will get a better offer.
- Use ctrl + c, ctrl+v if you want to copypaste something.
- What will you do if your manager asks you to work overtime?

II. Right (✓) or Wrong (✗)? Correct the wrong sentences.

1. **Wrong**. If you **don't** not tell your boss, he will be angry.
2. **Wrong.** If you have questions, **ask** more experienced programmers.
3. **Correct!** If you comment out this line of code, it won't crash anymore.
4. **Wrong.** The code **won't** compile if you **do not** close the bracket.
5. **Wrong.** What **will you** do if the company offers you a job abroad?

III. Imagine you explain simple programming rules to a beginner (use if).

1. If you don't call a function, it will not start running.
2. If you link your css and js files to your html document correctly, they will work.
3. What will happen, if you don't follow indenting rules?
